

IMPACT YOU

INNOVATION IMPACT PROGRAM 2023

If you are a fresh **Master's** or PhD graduate in the scientific fields, including Chemistry, Physics, Engineering, Bioinformatics, and similar, then we've got some amazing news for you! Henkel Adhesive Technologies is offering **new and exciting positions for international STEM graduates to join our Innovation Impact Program 2023 in Düsseldorf, Germany.**

As a part of this graduate program, you will get the unique opportunity to engage in three **6-month rotations for a total of 18 months**, working alongside our expert cross-functional teams and partners to drive innovation and create real-world solutions that will shape the future of Adhesive Technologies.

This program is the perfect launchpad for you to kick-start your career in the industry and become a leading expert in your field.

Apart from gaining valuable experience and expertise, this program guarantees you a **permanent contract** from the start. This provides you with security as you explore a range of cutting-edge technologies, including data-enabled services, CO2 reduction, automation, manufacturing 4.0, and many others.

Applications are now open until May 31st, 2023. We can't wait to welcome you as part of our new generation of talented innovators. Please refer to our website www.henkel.com/careers/innovationimpact for further details.
