

Centroid Investment Partners

Operation Team Internship Opportunity

About Centroid Investment Partners

Established in 2015, Centroid Investment Partners LC. is a Seoul-based private equity firm. Since its inception, Centroid has built a proven track record of executing strategic buyout transactions across a diverse set of industries in Korea. Some of our recent acquisitions include TaylorMade Golf, Concert Golf Partners, South Springs Country Club, Kolon Advance Fiber, and Woongjin Booxen. Centroid adds value to investor partners by strategically transforming companies to enhance profitability and competitiveness, while working closely with management and its diverse partners and professionals to advise on strategic growth.

Job Description

Centroid is seeking a highly competent and enthusiastic **intern to the Portfolio Operation Team** (Portfolio Operation Team provides inhouse-consulting services for Centroid's portfolio companies). In this role, you will support teams by conducting market data research and formulating business strategies for Centroid's portfolio companies. **This position offers a 3 months contract.** The **start date is ASAP** and can be negotiated.

Responsibilities

- Drafting memoranda, presentations, and other materials as required
- Conducting market research
- Assisting in the management of portfolio companies
- Performing financial analysis, operating model (as a scope of topline and bottom-line forecast)

Qualifications

- Previous internship experience at a top-tier management consulting firm is highly preferred.
- Well-rounded academic background from a prestigious institution
- Strong skills in logical thinking, quantitative analysis, and business writing
- Highly proficient in Microsoft Excel, Word, and PowerPoint
- Native-level proficiency in Korean and fluency in business English

How to apply

To submit your application please send a copy of your resume or CV in either Korean or English as a single PDF file with applicant's name to seunghan.kim@centroidip.com as soon as possible
