

Job Title: Senior Front End Developer (Solana Blockchain)

Location: Remote

Company: Trojan.app (Leading Trading Platform)

About Trojan

Trojan leads the way in cryptocurrency trading, known as the **largest Telegram trading bot** for facilitating over **\$10 billion in volume traded by more than 50,000 daily active users**. We deliver seamless on-chain trading experiences with advanced tools such as **DCA & limit orders, sniping**, and **automatic wallet copy-trading**. Our platform sets the standard in speed, innovation, and reliability.

Having secured more than half of the Telegram trading market share, Trojan is working on expanding its influence on the space with a new product designed for the web: **Trojan Trading Terminal**.

Why Join Us?

At Trojan, we thrive on innovation and efficiency. Joining our team means contributing to projects that revolutionise the crypto trading landscape. We're continuously expanding our offerings to elevate user experience and accessibility. This is your chance to contribute to a cutting-edge and widely used product that stands out in a competitive market for its reliability, speed and unmatched features.

Role Overview

We are looking for a highly autonomous and driven **Front End Developer** to collaborate with our existing developer and drive the creation of a high-performance web app. You will play a key role in translating Trojan's robust trading capabilities to the web, ensuring the experience matches our hallmark speed and efficiency.

Key Responsibilities

- **Build and Maintain:** Develop and maintain a responsive and user-centric web app with **React/NextJS** and **TypeScript**.
- **Collaborate with Vision:** Work under the guidance of the **Senior Full-Stack Developer** to ensure seamless integration between the front and back end.
- **Optimize for Speed:** Implement best practices to maintain the app's fast and responsive performance, especially on mobile devices.
- **Problem-Solve with Impact:** Tackle complex challenges with effective, innovative solutions that enhance user experience.
- **Champion Code Quality:** Ensure clean, maintainable, and well-documented code, contributing to a sustainable development environment.
- **Engage in Real-Time Features:** Support the integration of real-time data and enhance user interactions for trading functionalities.

Requirements

- **Experience:** 5+ years in front-end development with significant experience in **React/NextJS** and **TypeScript**.
- **Self-Motivation:** Proven ability to work independently, with a proactive mindset to push tasks forward.
- **Leadership Insight:** Candidates have held leading roles in (crypto) trading platforms/exchanges, contributing to critical platform components.
- **Autonomy:** Ability to work independently and proactively manage tasks.
- **Technical Excellence:**
 - Expertise in creating fast, dynamic and optimised web interfaces.
 - Comfort with real-time data handling and websocket management.
- **Innovative Thinking:** Adept at identifying potential challenges or improvements and implementing effective solutions promptly.
- **Clear Communication:** Strong ability to articulate ideas and collaborate effectively with team members.
- **Interest in DeFi:** A genuine curiosity and understanding of cryptocurrency and trading trends.

Preferred Experience

- Experience working with trading platforms, DeFi, or similar tech.
- Familiarity with CI/CD workflows and collaborative development tools.
- Familiarity with memecoins trading on Solana and related market dynamics.
- Fluency in both spoken and written English.

What We Offer

- **Flexibility:** Work remotely on your own schedule.
- **Growth and Innovation:** Be part of a lean team that is constantly evolving and integrating the latest in trading technology.
- **Impactful Work:** Your contributions will directly shape the user experience of one of the most used trading tools on the market.
- **Collaborative Culture:** Join a team that values innovation, efficiency, and collaboration.
- **Salary Range:** USD 90,000 – USD 180,000 (depending on experience).
