

**Job Title:** Quantitative Trader (Full-time)

**Team:** To be determined

**Location:** 14F, Metro Tower, 10, Toegye-ro, Jung-gu, Seoul

---

## About Alphanonce

Founded in 2018, Alphanonce has established itself as a leading quantitative trading and investment firm with a strong presence in Korea and Singapore. Leveraging advanced quantitative methodologies and deep understanding in asset valuation, Alphanonce aspires to address market complexities and inefficiencies. The firm offers a comprehensive suite of services, ranging from acceleration support in the primary market to liquidity engineering and quantitative trading strategy development in the secondary market

## Role Description

You will be joining a team of experienced quant traders, researchers and engineers, who are dedicated to developing profitable trading strategies and algorithms. As a team member, you are required to take part in monitoring and managing our portfolios and markets with vigilance and expertise. Additionally, you are further encouraged to think creatively to maximize our returns within a precalculated risk profile. Your insights and hypotheses will directly contribute to real-world profits.

## Responsibilities

- **Market monitoring & Portfolio management:** Vigilant monitoring and management of balance and trading positions, adherence to risk limits and optimization of performance metrics
- **Maximizing Profit Through Analysis:** Analyze various datasets to improve and optimize our trading algorithms and explore further identity relationships among unique data points. Distinguish pitfalls to avoid and opportunities to catch
- **Research and development:** Deep dive into a world of creativity to identify money making signals across markets

## Required Qualifications

- (Required) Degree(s) in quantitative finance and economics, mathematics, physics, statistics, computer science, engineering or a related field
- (Required) Proficiency in at least one programming language such as Python
- (Required) Excellent analytical and problem-solving skills contribute to strong market intuition.
- Background in statistical modeling, time series analysis or machine learning
- Knowledge in cryptocurrency markets, blockchain technology and trading platforms is plus
- Experience working in quantitative finance, algorithmic trading or cryptocurrency trading industry
- Ability to work effectively in a fast-paced environment, both independently and as part of a team
- Global mindset with active communication skills for engaging with overseas offices, clients, and partners

**What you can achieve**

- Competitive salary
- Collaborative company culture centered around integrity and merit
